RESPONSIVE DESIGN STRATEGIES: MAX-WIDTH AND MIN-WIDTH

DESKTOP-FIRST

500px

Maximum width at which media query still applies

max-width: 1200px

(is `width <= 1200px ?`)

max-width: 900px

(is `width <= 900px ?`)

max-width: 600px

(is `width <= 600px ?`)

Our initial **desktop-first** code goes here

0px   600px   900px   1200px   ∞

Our initial **mobile-first** code goes here

(is `width >= 1200px ?`)

min-width: 1200px

(is `width >= 900px ?`)

min-width: 900px

(is `width >= 600px ?`)

min-width: 600px

MOBILE-FIRST

Minimum width at which media query starts to apply

Media queries don't add any importance or specificity to selectors, so code order matters — **media queries at the end**
